On the road to economic growth

THE OPENING of Dumisani Makhaye Drive in KwaZulu-Natal paves the way for economic development.

SAnews

The new Dumisani Makhaye Drive not only addresses the challenge of apartheid spatial planning but it also paves the way for economic development for communities in the area. Speaking at the formal opening of the road President Jacob Zuma said: "The road is of high quality. It demonstrates government's commitment to growing the economy and creating much-needed jobs in the community."

The R1.3 billion project is the biggest road infrastructure development in the country in five years and also the most complex road project to be undertaken in years. It forms part of government's nationwide programme to upgrade infrastructure. The road spans the uMngeni River and provides a strategic link between Duffs Road in KwaMashu and Dinkelman in New Germany. It shaves 16 kilometres for traffic using the N3 to connect to the N2.

"This is a major step in the government's drive to create easy access for communities for socio-economic development."

This makes the communities of Newlands, KwaMashu, Inanda, KwaDabeka, Clermont and Pinetown more closely connected. It is set to ease traffic congestion in the eThekwini Metropolitan Municipality.

Significantly, the road will serve as a new alternative route to the King Shaka International Airport for traffic coming from the Pietermaritzburg and Pinetown areas, which will ease

Classroom overcrowding brought to book

THE GAUTENG Department of Education has opened a new school that will help ease learner influx pressure.

SAnews

The newly-built state-of-the-art Seshegong Secondary School in Olievenhoutbosch, Centurion, will help alleviate classroom congestion.

The school will cater for 1 200 children from grades eight to 12. Because of its size, it is classified as a mega school designed to respond to the province's demand trends.

Gauteng Education MEC Panyaza Lesufi said the school is a modern information technology-based facility that incorporates the Department of Education's National Schools Infrastructure Norms and Standards.

According to the department, a success of the project has been the increased involvement of the community in the planning, implementation and ongoing management of the facility.

"The impact the project has had on the beneficiary community has been remarkable. Its success cannot be measured merely in direct benefits, such as the number of buildings erected, but rather the human benefit that the community has derived from being part of the process."

"We will continue to open such schools every month until 2019 in our quest to change the face of township schools."

A total of 2 110 people were employed during construction, including contractors, and at least 31 subcontractors were used.

The school's smart classrooms are connected to a Wi-Fi network that allows students to make use of the internet. It is also fitted with an intercom system, CCTV cameras and an alarm system.

The facility complies with the latest Green Building practices and the water system uses solar water heating. To mitigate water usage, rainwater is harvested and used for irrigation and to flush toilets, which reduces the usage of the council water.

To boost security at the school, a guard house has been built, security steel meshes installed and a clear view fence divides the school area and sports field.

MEC Lesufi pleaded with the community to "protect this school for many generations".

"We will continue to open such schools every month until 2019 in our quest to change the face of township schools," he said. V
