## Stay at home, save South Africa!

In the coming days and weeks, 10 000 Community Health Care Workers will be deployed across the country to conduct door-to-door screening in our most vulnerable communities

### More Matshediso

The novel coronavirus (COVID-19) outbreak has claimed thousands of lives and turned the world upside down.

South Africa has not been spared, with its infection rate growing.

Government initially imposed restrictions to enforce social distancing but as the infections spread, a national lockdown was announced by President Cyril Ramaphosa and came into effect on 26 March.

He highlighted that never before in the history of South Africa's democracy has the country been confronted with such a severe situation.

The President said the nationwide lockdown was a necessary move to contain the spread of COVID-19 and 'flatten the curve' in South Africa.
