COVID-19 is dangerous and we must take care

WITH 196 750 coronavirus cases and 3 199 deaths recorded by 5 July, government is again urging citizens to protect themselves and adhere to lockdown regulations.

Allison Cooper

South Africa is seeing a fast rise in its number of coronavirus (COVID-19) cases and government expects infections to surge in July and August.

The word surge entails a sudden and big increase in the number of positive cases, as recently seen in Gauteng, where the number of infections has grown to over 63 400 in a short period of time.

Health Minister Zweli Mkhize explains that various factors will contribute to the surge, including people moving around more; people getting together in groups; and people not wear-

ing face masks and not social distancing.

As a result of the increasing number of cases, President Cyril Ramaphosa has extended the employment of 20 000 South African National Defence Force (SANDF) members from 27 June until 30 September.

Apart from helping to maintain law and order and protect the country's borders, the SANDF will work with the National Department of Health in managing the virus through the provision of field hospitals, medical screening and quarantine facilities. It will also support the Department of Cooperative Governance and Traditional Affairs' efforts to maintain and enhance the

President Cyril Ramaphosa has extended the deployment of 20 000 South African National Defence Force members until 20 September 2020 to help manage the virus.

living conditions of the population. This will include the supply of water.

After visiting Mpumalanga on 3 July, President Ramaphosa said he was pleased with the province's efforts to fight the

virus. Mpumalanga is one of the least affected provinces. At the time of the President's visit, it had 1 478 cases, with 520 recoveries and nine fatalities.

He warned, however, that while more industrialised prov-

inces with bigger populations had far more cases, the surge in infections would hit all regions. People must not let their guard down, he said.

Grow your own food and save money

Silusapho Nyanda

A gardener in Kwa-Zulu-Natal has proven to be a smart businessman, selling his home-grown produce to put money in his pocket. This is thanks to the One Home, One Garden and Fruit Tree programme aimed for Kwa-Zulu-Natal residents.

Muziwakhe Nsele (42) is a popular man in Hlathini, a village near Melmoth where he lives and sells vegetables such as beans, cabbage and potatoes.

Nsele's business grew in leaps and bounds following the outbreak of the coronavirus (COVID-19), with people buying from him rather than travelling

to the shops.

With his profit, Nsele has bought six goats and plans to expand his agriculture business. "I will also be investing in layers and broiler chickens to expand my income streams through the sale of eggs and whole chickens," Nsele says.

The father of six says his business received a boost from the One Home, One Garden and Fruit Tree programme run by the province's Department of Agriculture and Rural Development (DARD).

The programme encourages people to start gardening at their homes as a means of fighting poverty and Nsele received seeds, fertiliser and advice from DARD.

■ Muziwakhe Nsele is becoming a successful businessman, thanks to his vegetable garden.

DARD MEC Bongiwe Sithole-Moloi says the One Home, One Garden and Fruit Tree programme assists families that are suffering because of COVID-19. She says: "The programme

remains a crucial seed for a sustainable rural economy and with specific interventions and support from DARD, it can reduce and eliminate poverty through subsistence farming." V

To be part of the programme, visit the office of DARD at your local municipality. The contact details of the DARD offices can be found on the department's website www.kzndard.gov.za. Alternatively, call the department at 033 355 9100.

Tips on how to start a garden:

- Make sure you know which plants your soil will support.
- Ready your garden by first ploughing the land more than once without planting.
- Add fertiliser.
- Remove all weeds.

Ku aka vutomi byo antswa

Kusuka eka masungulo ya xiyimo xa le hansi emugangeni wa KwaNongoma, eKwa-Zulu-Natal, Silondiwe Magwaza wa 23 wa malembe hi vukhale u hlurile swikanganysi swo tala ku fikelela no-rohwa yena wo va minjhene wa swa vumaki.

Ku kula a rhendzeriwile hi miako ya xiyimo xa le hansi swi hlohlotele Magwaza ku ringeta tindlela tintshwa ku tlakusa muganga wa ka vona.

Sweswi hi yena munhu wo sungula endyangwini wa ka vona ku kuma digiri.

Magwaza u thwase eYunivhesiti ya Witwatersrand hi 2019, a kuma digiri ya masungulo ya tidyondzo ta vumaki.

"KwaNongoma yi na swi-makiakulu swa xiyimo xa le hansi naswona ku hluvuka swi tikomba swi nonoka swinene.

Don't share fake news!

Allison Cooper

Nelisiwe Dlamini (30), a researcher at the Council for Scientific and Industrial Research (CSIR), says it's important to verify stories from social media, especially those about the coronavirus (COVID-19), before sharing them.

Passionate researcher at the CSIR, Nelisiwe Dlamini, warns South Africans, especially the youth, not to share fake news because it creates panic especially during the COVID-19 pandemic.

"Some young people are becoming ringleaders of the spread of false information. This has the potential to create panic," she says.

Since the outbreak of COVID-19, the CSIR has created a dashboard to assist government and health institutions to track the spread of misinformation, in order to avoid unnecessary public panic. The dashboard categorises information as misinformation (misleading content), disinformation (information that is untrue and mal-information (hate speech).

Dlamini is part of the team that does research and analysis to help categorise in-

formation in the dashboard.

A data dashboard is an information management tool or website that tracks, analyses and displays information to monitor the performance of a business or department.

According to Dlamini, social media platforms become a great danger when used to share false information.

"Whether it's with the intention to harm or not, it creates social conflict, distracts people from the real issues and undermines government's, public authorities' and other organisations' efforts to curb the spread of COVID-19 and maintain social order."

She says there are numerous ways to identify fake news, including reading the whole story and not just the heading, being critical of everything you read and examining the source of the story.

"Reporting fake news is necessary, as it will help

to take down fake news stories from multiple platforms," says Dlamini.

A journey to research

Dlamini joined the CSIR in 2014, when she was awarded a studentship to pursue her MSc Computer Science degree. "It was a foot in the door for me and has since afforded me great opportunities," she says.

She was also awarded a grant from the Young Researcher's Establishment Fund, which she sites as a wonderful opportunity in her career.

Born in Pinetown, Kwa-Zulu-Natal, Dlamini says women hoping to follow in her footsteps need to be interested in and have a passion for research.

To become a researcher, learners need to take maths and science in high school. "After school I studied computer science and information systems and technology,

which laid a strong foundation for me," says Dlamini, who also holds a BcomHon Information Systems and Technology degree.

She didn't always know she wanted to be a researcher. "When I joined the CSIR, I was so amazed by the multi-disciplinary research that is done to make a difference in our country," she says.

This Women's Day, Dlamini says if there was ever a time for women to be bold and do everything they have ever wished to do, it is now. "We need to support each other and unite and always remember to celebrate each other. This alone will propel us."

You can report fake news by emailing fakenewsalert@dtps.gov.za, sending a WhatsApp to 067 966 4015 or on the website www.real411.org.
