Stay alert during COVID-19 level 1

PEOPLE MUST continue to wear their face masks and follow all other safety protocols so that South Africa can overcome the pandemic and regrow the economy.

Sphelele Ngubane

The country has moved to Coronavirus Disease (COVID-19) alert level 1 but government urges people to continue with all the precautionary measures aimed at curbing the spread of the virus.

The wearing of face masks remains compulsory and there are still some restrictions to maintain low levels of infections and, in particular, to prevent super-spreading events. It has been a year since the first case of COVID-19 was reported in South Africa. More than 1.5 million

people have been infected and over 50 000 have died from the disease.

Dr Nkosazana Dlamini Zuma, the Minister of Cooperative Governance and Traditional Affairs, has provided details of the regulations that have changed, including the new curfew, which is from midnight to 4am. People may only be out of their properties during this time if they have a permit or a security or medical emergency.

Gatherings

The maximum number of people attending a religious, social, political or cultural gathering is 100

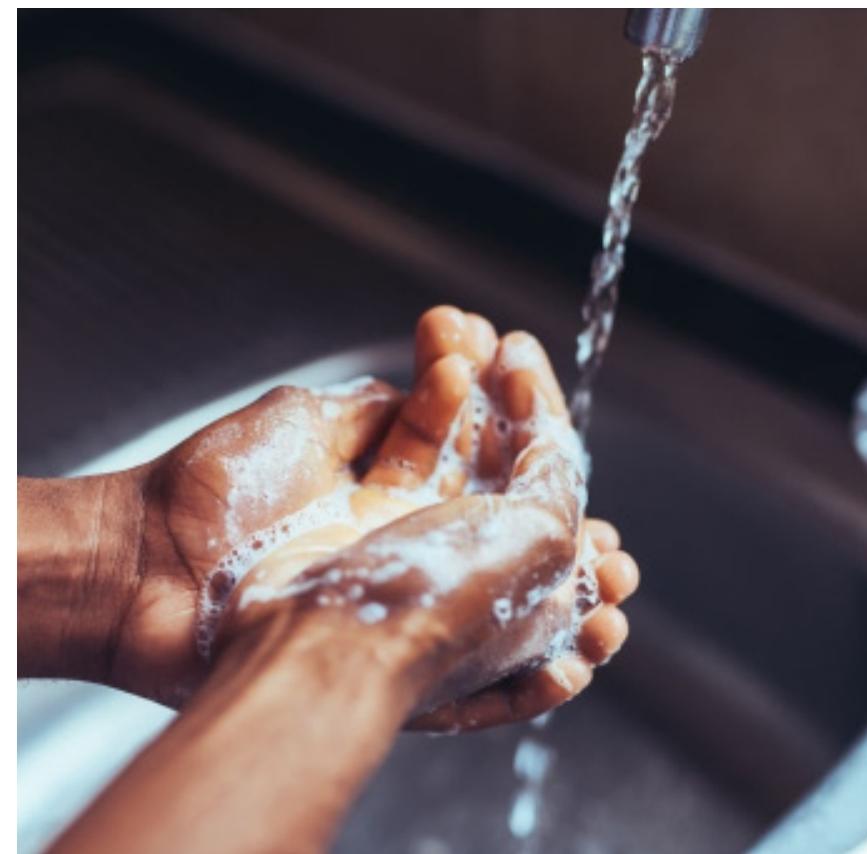

indoors or 250 outdoors, provided that the venue is big enough to allow for social distancing.

The number of people attending a funeral is limited to 100. If the venue is too small for people to be at least one-and-a-half metres from each other, then not more than 50% of the capacity of the venue may be used. Night vigils or after-funeral gatherings, including 'after-tears' gatherings, are not allowed.

Local doctor opens free clinic for Chatsworth community

COMMUNITY-FUNDED clinic gives patients with COVID-19 a fighting chance.

■ Dr Diveshni Govender helping a COVID-19 patient at the Havenside Clinic.

A new clinic opened by a Durban-based doctor is assisting the community in the fight against the Coronavirus Disease (COVID-19)

and it is doing it for free. The clinic, operating from the Havenside Community Hall in Chatsworth, was established by Dr Diveshni Govender (39) in a bid to

cope with the second wave of COVID-19 infections. Hundreds of patients have been treated at the clinic since it opened its doors in January.

"The number of COVID-19

patients we were seeing increased to the point where I had to treat some patients in their cars, in the shopping complex where my practice is located," she says.

Dr Govender contacted community activists to assist with getting her access to use the Havenside Community Hall as a makeshift clinic. Govender says that the clinic is run on donations from several non-governmental organisations, businesses and members of the community.

The 30-bed clinic has helped patients like Jeeveshni Abraham (47) and her family. Abraham, her husband and two children were admitted to the clinic after her symptoms started to worsen.

"At the clinic, we received quality care and medication. We also had access to oxygen to help with breathing a little easier when we were in distress. The clinic also admitted my brother, his wife and children when they con-

tracted the virus," she says. When Abrahams and her family were discharged from the clinic they received medicine packages to take home.

Dr Govender says that the free medicine they dispense from the clinic is made possible through donations from members of the community.

According to her, the clinic mainly treats patients who are above 45 years of age, with about 10% of patients under the age of 12. She says that the clinic has also partnered with a private ambulance company to transport patients who need elevated care to a hospital, at no cost.

Dr Govender says: "The partnership has saved several lives as patients who are in urgent need of transport to a hospital no longer have to wait a long time for an ambulance."

Dr Govender is assisted by two nurses and has also employed a cleaner to assist at the clinic. ▶
