## Vaccine drive gathers pace

Image: Department of Health

The COVID-19 vaccination programme has expanded to include police officers and other security personnel, among other groups.

**A**s South Africa battles a third wave of the Coronavirus Disease (COVID-19), the country's mass vaccination programme is expanding to include more categories of people.

South Africans between the ages of 50 and 59 are expected

to start receiving vaccines from 15 July.

"The [vaccination] programme has picked up significant momentum, with key milestones being achieved as we move forward," said President Cyril Ramaphosa.

The first phase of the vaccination programme focused on

healthcare workers, while the second phase targeted the age group of 60 and above.

The national vaccination programme is now continuing along defined streams.

The first stream is the general population according to age groups. On 1 July, registration for vaccination on the Elec-

tronic Vaccination Data System (EVDS) opened to 50 to 59 year olds.

The second stream commenced with those working in the basic education sector, which includes teachers. They started receiving vaccines in June.

The third stream is focusing on police and other security personnel. Those who fall under this sector started receiving the vaccine at the beginning of July.

The fourth stream is through workplace programmes in key economic sectors, such as mining, manufacturing and the taxi industry.

### Arrival of vaccines

The vaccination programme is expected to pick up pace with the arrival of more vaccines in the country.

Acting Health Minister Mmamoloko Kubayi-Ngubane said about 2.1 million doses of the Pfizer vaccine are expected to

arrive in July.

Pfizer delivered nearly 4.5 million doses in quarter two and has committed to just over 15.5 million doses in quarter three.

"Johnson and Johnson has so far delivered 500 000 early access doses used for Sisonke, 300 000 market doses two weeks ago and 1.2 million doses, [which] landed recently. These doses all need to be used by 11 August."

The country is also awaiting confirmation of a further of 500 000 doses, which expire on a later date than the other doses.

### Red alert

While Gauteng remains the epicentre of the COVID-19 pandemic Minister Kubayi-Ngubane has warned that many provinces in the country are almost at red alert as infections continue to increase.

# Bees make life sweeter at Moja Gabedi

Allison Cooper

**A** University of Pretoria (UP) community engagement project is training students and community members to become beekeepers in Hatfield, Gauteng.

Six people are being trained to care for beehives that were discovered at Moja Gabedi, a UP community engagement project which was an unofficial rubbish dump for about 100 years.

Moja Gabedi was an unsightly, empty lot in Festival Street, not far from the university's Hatfield Campus.

The university's Commu-

nity Engagement Unit transformed the dumpsite into a shelter for the homeless, with lush gardens, vegetables, trees and flowing canals.

"When we started clearing the site, we discovered bees deep underground in a corner of the plot. When the site was developed further, professional beekeepers were called in to relocate the bees into a hive," says Gernia van Niekerk, Moja Gabedi's Community Engagement Manager.

While there was initially only one hive, three more have been added since June 2020.

This presented an opportunity to train UP students and

community members to care for the hives, and Mike Lang from Urban Bees offered to conduct a beekeeping course.

Thanks to sponsors of protective gear and tools for beekeeping, the course was offered for free to two UP students, three community members and two urban farmers.

They all attended an introductory class and were taught about bees, how a bee colony works, how to work with beekeeping equipment and safety practices.

UP student Daddy Kgonothi says at first, he wasn't really interested in bees.

"When I learnt more, I understood that one should

make the garden user-friendly for bees. If you know how to approach bees correctly, you'll come to see that they are fascinating insects, he says.

Community member Reckson Tshehla, who also attended the course, is keen to expand his knowledge about bees.

"It was the first time I saw a queen bee. I never thought I would get the opportunity to learn about bees."

"Moja Gabedi changed me. I experienced many things for the first time. Everything is so well organised," he says.

Follow up training and practical classes will be conducted on colony management, managing diseases, honey production and processing, handling beeswax and pollen trapping. Those who complete the training will work with the site's bees and get practical experience with Urban Bees.
