R11 billion allocated for jobs

THE ECONOMIC Reconstruction and Recovery Plan is helping the country's economy and people recover from the COVID-19 pandemic and recent unrest.

The Presidential Employment Stimulus Package has allocated an additional R11 billion to support employment, as part of the Economic Reconstruction and Recovery Plan (ERRP).

President Cyril Ramaphosa recently made this announcement when responding to questions during a sitting of the National Assembly.

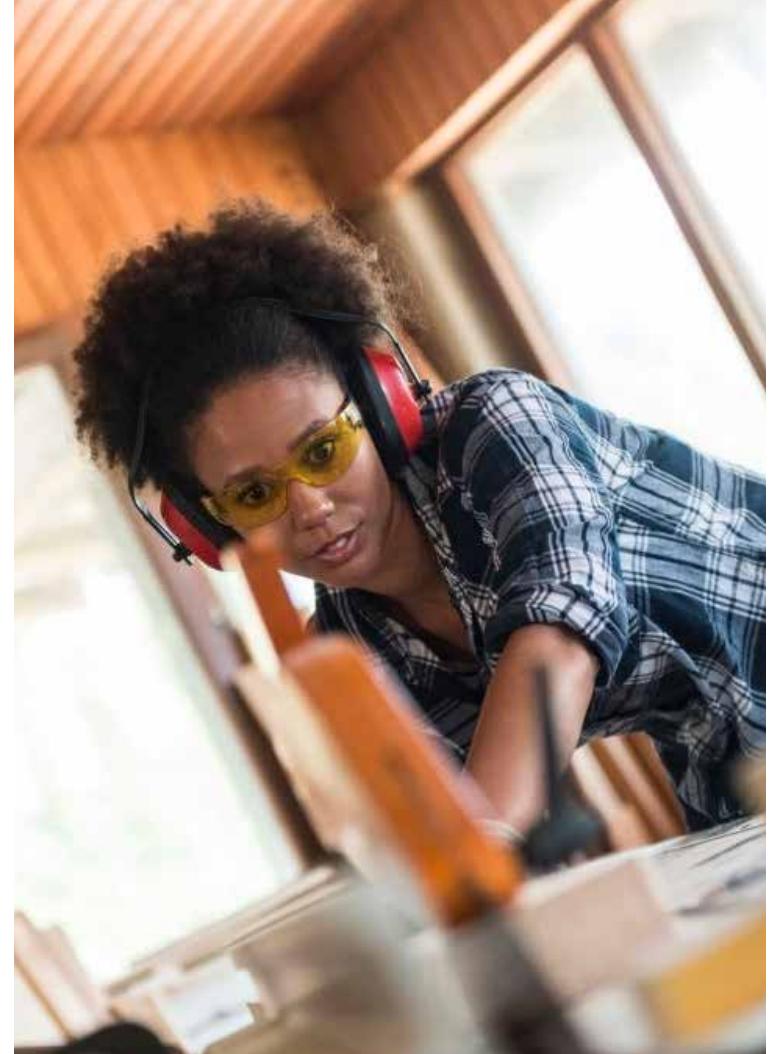

He said initiatives such as the Basic Education Employment Initiative will continue, with the aim of creating jobs for the youth who have assisted in schools as part of the response to the Coronavirus Disease (COVID-19) pandemic.

Support for small-scale farmers and workers in the early childhood development sector also forms part of the stimulus package.

"The Presidential Employment Stimulus Package has supported close to 700 000 job opportunities to date, and largely to young people," he said.

The country's unemployment statistics have highlighted the urgent need for the public and private sectors to be actively involved in implementing the EERP.

Results for the second 2021 Quarterly Labour Force

Survey (QLFS), recently released by Statistics South Africa, showed that unemployment has increased by 1.8%.

"The statistics released for the second quarter of this year are a reminder of our unemployment crisis and the extent of poverty in our country.

"While the interventions

contained in our EERP are necessary and significant, I will say now that they are not enough," said the President.

He added that job creation can no longer be the mission of government alone.

"The time has now come
