DITABA TSE AKARETSANG

Working on Fire programme supports farmers, creates jobs

The Department of Environmental Affairs' Working on Fire (WoF) programme has plans in place to support farmers who are affected by climate change.

"During El Nino farmers continuously experience veld fires on an ongoing basis. Just this year for instance, we anticipate that we will have to fight fires that are close to 3 000," said Environmental Affairs Minister Edna Molewa.

Minister Molewa indicated that there is a budget allocated to support small and commercial farmers.

"We've allocated R528 million just in this financial year alone. Working on Fire has got almost R1,3 billion allocated to assist farmers," said Minister Molewa.

The Working on Fire programme has also created a total of 13 660 jobs in the past three years.

The programme was launched in 2003 as part of government's drive to create jobs and alleviate poverty.

"This programme has the capacity to provide many more jobs, necessitating the need for a higher budget," said Environmental Affairs Minister Edna Molewa.

The total expenditure for the Working on Fire programme for the 2012/13 financial year was R404 205 524, in the 2013/14 financial year it was R405 540 125 and in the 2014/15 financial year it amounted to R508 222 000.

"There is a major need for fire management capacity from WoF for both using fire for ecosystem management and combatting wild fires," Minister Molewa said.

The programme ensures that South Africa's Biodiversity and Ecosystems are protected and contribute to socio-economic growth as well job creation.

The Working on Fire programme has not only created jobs but it also offers relief to farmers.

The programme is one of several departmental programmes under implementation through government's Expanded Public Works Programme (EPWP).

The EPWP has been the primary vehicle through which the Department of Environmental Affairs has delivered on its job creation mandate.

"Today more than 5 000 young men and women are employed through the programme. They are recruited from marginalised communities and trained in

fire awareness and education, prevention and fire suppression skills," said the department said.

They are trained as veld and forest fire fighters and are stationed in more than 200 teams throughout South Africa.

"Furthermore a total of 592 Black Economic Empowerment compliant suppliers have benefited from the programme between 2013 and 2015, to the value of R395 144 169.00," said the department.

Government one step ahead in drought relief

Noluthando Mkhize

Government is working hard to ensure that South Africans continue to have access to water even during the current drought that the country is facing.

The Department of Water and Sanitation is rolling out comprehensive interventions to minimise the impact of drought.

So far, the department has deployed water tankers to provide water to areas that are hardest hit by the drought.

These areas include KwaZulu-Natal, Free State, and Limpopo, which have been declared disaster areas.

Water and Sanitation Minister Nomvula Mokonyane said her department has committed R352.6 million to the initial drought intervention projects and a further R96.620 million to the provisional tankering and additional interventions.

She added that to address and mitigate the potential impact of the drought immediate, short, medium and long-term measures were being put in place.

The Minister said the measures included strict implementation of drought operating rules at all dams, including restrictions.

"The department will implement water conservation and demand management programmes which includes the War on Leaks and drop the block interventions."

This also includes emergency interventions by tankering and climate research as well as hydrological and geo-hydrological monitoring.

BUYING OF WATER TANKERS

Minister Mokonyane said the Department of Water and Sanitation, through its National Water Resource Infrastructure Unit, is manag-

ing the procurement of 45, 18 000 litre water tankers.

A total of 682 water tanks with stands will be distributed to municipalities in KwaZulu-Natal such as the Ugu District Municipality (DM), Umkhanyakude (DM), Illembe DM and Harry Gwala DM.

"Illembe DM in KwaZulu-Natal has completed their tank stand installation. Umgeni Water has completed the 30 tanks in Harry Gwala DM in KwaZulu-Natal, along with 81 tanks that have been installed in Umkhanyakude DM. The budget limitation of R2 million allowed for 81 tanks not the 500 they had requested," said Minister Mokonyane.

"Additional sites are being identified in order to utilise the savings on the budget. Umgeni Water has completed 20 of the 144 Ugu DM tanks. Uthukela DM is beginning the procurement process for the installation of their tanks."

BOREHOLE INTERVENTIONS

She added that approval was granted to appoint a key service provider to buy siting, drilling and hydrogeological services to implement borehole interventions where the DM did not already have contracts in place.

Work started at the Umkhanyakude and Illembe DM in September 2015.

"Interim tankering and second phase intervention in five district municipalities, namely Umkhanyakude, Umzinyathi, Ugu, Amajuba, and Uthungulu, have been approved for the total amount of R96 620 552.00."

The department's Deputy Director-General for Planning and Transformation, Deborah Mochotlhi, said that the re-use and desalination, eradication of illegal water use, drilling of boreholes in suitable areas and rainwater harvesting were short term

interventions.

She added that there are transfers of schemes from the Lesotho Highlands Water Project Phase 2, emergency transfer Tugela to Goedertouw, Othongathi River transfer to Hazelmere and infrastructure upgrade developments in Hazelmere, Clanwilliam and Tzaneen.

Mochotlhi said was appealing to every individual to use water sparingly and adhere to water restrictions as well as efficient water use practices including not filling swimming pools, or watering their gardens during the day.

PROVINCIAL DAM LEVELS

Minister Mokonyane said in selected drought areas, such as KwaZulu Natal, the average dam storage of the large schemes is 69 per cent with three of 18 schemes below 50 per cent of full supply capacity.

"An estimated 6 500 stand-alone rural communities are currently experiencing water shortages. These are mostly situated in KwaZulu-Natal, Mpumalanga, Limpopo, and North West provinces. This number could increase to over 11 000 rural communities as the dry period extends and local water resources get depleted."

She said in drought stricken areas such as the

Water and Sanitation Minister Nomvula Mokonyane says the department has a number of interventions in place to minimise the impact of drought.

northern parts of KwaZulu-Natal, southern parts of Mpumalanga, and selected areas in Limpopo, North West and Northern Cape, about 50 per cent of local water storage was facing challenges and needed to be managed properly.

The drought currently affects 173 of the 1 628 water supply schemes nationally, serving approximately 2.7 million households or 18 per cent of the national population.

In Gauteng the municipalities are experiencing strains on the supply systems due to high demand and current high temperatures.

Government provides support to farmers

Rural Development and Land Reform Minister Gugile Nkwinti.

Albert Pule

Government has allocated more than R260 million to farmers across the country to deal with the impact of drought.

The total set aside for drought relief efforts country-wide amounts to R524 million.

Minister of Agriculture, Forestry and Fisheries Senzeni Zokwana said the funds would be distributed to farmers in consultation with the provincial departments of agriculture.

The department also spent R9 million on drilling boreholes for livestock water, disseminating early warning information and providing appropriate advice to farmers.

"There will be a provision of R36.5 million by provincial Departments of Agriculture to relieve small scale and subsistence farmers in affected provinces," said Minister Zokwana.

His department will also provide R226 million to smallholder farmers to both maintain production animals and "encourage the herd reduction through the market".

Other measures by department will include:

- Drilling and equipping affected areas for additional boreholes for livestock.

- Facilitating and supporting the revolution of credit facilities die to crop failure.
- Monitoring food prices through the Food Price Monitoring committee to inform appropriate measures are taken to ensure food security.
- Coordinating interdepartmental food nutrition security interventions to mitigate the effects of drought on farmworkers and rural communities.

The Department of Agriculture, Forestry and Fisheries is considering reprioritising conditional grants to make funds available to help farmers in get animal feed and additional water supply for their animals.

The Minister added that the department would continue providing farmers with weather advisories and warnings to guide future crop plantation and reduction of stock.

Meanwhile the Department of Rural Development and Land Reform will relocate livestock from the worst affected regions in the five regions to state-owned land where there is still better grazing land. The department is allocating almost R187 million for this drought relief intervention.

These include the provision of water for livestock in areas where boreholes can be drilled and construction of water troughs through RADP funding support and the Animal and Veld Management programme.

According Minister Gugile Nkwinti, the department has engaged some of the commodity organisations such as the sugar industry, Grain SA who will be in partnership with the Department, and the provincial Departments of Agriculture to implement the identified short term, medium and long term draught relief interventions.

"In the North West we have recently allocated 200 000 hectares of land. I am expecting the provincial government to disaggregate the land in the same way that KwaZulu-Natal did," said Minister Nkwinti.

DIKELETŠO TŠA GO BOLOKA MEETSE

- Batho ba swanetše go hlokomela go se šomiše dinoka goba mabopo a dinoka bjalo ka tholite.

Ka serapaneng

- Ka mehla nošetša dibjalo tša gago e sa le ka mesong goba mantšiboa, ge thempereitšha e le fase. Magareng ga 10:00 le 15:00 motho a ka lahlegelwa ke 90% ya meetse ka go moyafala.
- Nako le nako ge o bediša lee, boloka meetse ao go a šomiša ge a fodile go dibjalo tša gago tša ka gae. Di tla hloga go diphepo tše di tšwago go dikgapetša tša mae.
- Tsepelela go dibjalo tša thago le tše di sego tša thago ya mo gae tše di sa šomišego meetse (e sego dibjalo tše di thaselago tše e sego tša mo gae).
- Bea dibjalo ka dihlopha go ya ka dinyakwa tša meetse le go di petela go di dikologa.
- O se nošetše dirapana nako le nako eupša o di nošetše gabotse. Ge o šomiša lethompo o ka šomiša tekano ya dilitara tše 30 tša meetse ka motsotso.
- Tloša dibjalo tše di thaselago mo lefelong la gago.
- Meetse ao a tšwago mo thakeng ya ntlo a ka ba le mohlola ge a lotlwe ka ditankeng, go tlo šomišwa go nošetša dirapana.
- Šomiša "meetse a masehla" – meetse ao a šomišitšwego go tšwa dipafong, metšheneng ya go hlatswa le methopong ye mengwe ye e bolokegilego – go nošetša serapano sa gago.
