SA urged to register to vote

South Africans have been encouraged to register to vote in the upcoming local government elections.

The first registration weekend will be on 5 and 6 March. President Jacob Zuma announced during the State of the Nation Address, in Parliament, that the local government elections will be held within three months after 18 May, the date of the

last local government elections.

"We urge the youth, in particular those who are turning 18 this year, to register in their numbers for this first ever opportunity to cast their votes," said President Zuma.

FINDING YOUR CORRECT VOTING STATION

All eligible voters (South African citizens aged 18 or older) should ensure they are registered in the correct voting district where they ordinarily live. Voters who are already

registered can SMS their ID number to 32810 (cost R1) to receive confirmation of their voter registration details including the name of their voting station.

Voters need to take with them their green barcoded ID book, smart ID card or a valid temporary ID certificate to the voting station. No other forms of ID are accepted for voter registration.

It's important for voters to vote where they live.

Register to vote in the 2016 Municipal Elections on 5 and 6 March 2016. All voting stations will open from 8am to 5pm over the weekend of Saturday 5 March and Sunday 6 March.

There are a number of ways voters can find their correct voting station:

- Call the Electoral Commission Contact Centre on 0800 11 8000 between 7am and 9pm weekdays.
- Use the voting station finder app on the IEC website at www.elections.org.za
- Dial *120*IEC# (*120*432#)

ANGARHELO

Govt sets aside billions for new port facilities

Government is investing billions to new port facilities. In 2014 Operation Phakisa was launched and implemented in the ocean economy, health, education and mining sectors.

Janine Arcangeli

President Jacob Zuma said R7 billion has been committed to new port facilities.

This follows the adoption of a public-private partnership model for port infrastructure development by Transnet National Ports Authority.

Delivering his State of the Nation Address in Parliament last month, President Zuma said government was concerned that South Africa did not own vessels while the country is surrounded by about 3 000 kilometres of

coastline.

"Through the oceans economy segment of Operation Phakisa, we are trying to solve this challenge.

"I am pleased that two bulk carrier vessels have been registered in Port Elizabeth, and a third tanker in Cape Town under the South African flag," he said.

The Operation Phakisa Big Fast results methodology was launched in 2014 and implemented in the ocean economy, health, education and mining sectors.

Through Operation Phakisa, government aims to implement its policies and pro-

grammes better, faster and more effectively.

Another positive Operation Phakisa development has been the launch of a fuel storage facility in Cape Town, bringing an investment of R660 million.

"Aquaculture appears to be an important growth area within the oceans economy segment of Operation Phakisa. Close to R350 000 private sector investment has thus far been committed in the aquaculture sector.

"Nine aquaculture farms are already in production. These farms are located within the Eastern Cape, KwaZulu-Natal, Western Cape and Northern Cape," said the President.

Operation Phakisa is an adaptation of the Big Fast Results methodology that was first applied by the Malaysian Government, successfully, in the delivery of its economic transformation programme.

The operation addressed their national key priority areas such as, poverty, crime and unemployment.

It involves setting up clear targets and follows up with on-going monitoring processes which makes the results public.

Through this initiative, the Malaysian government was able to register impressive results within a short period.
