Phakisa !! Phakisa !

Smallholder farmers are expected to play a major role in the implementation of Operation Phakisa for Agriculture, Land Reform and Rural Development.

Noluthando Motswai

President Jacob Zuma launched Operation Phakisa on Agriculture, Land Reform and Rural Development in Pretoria recently.

The central theme for Operation Phakisa for Agriculture, Land Reform and Rural Development is "Transforming the Agricultural Sector towards an Inclusive Rural Economy."

President Jacob Zuma said

it captures critical elements of government's socio-economic blueprint, the National Development Plan, and the 2017-2019 roadmap for radical economic transformation.

The President said land

reform is a central pillar of the radical economic transformation programme. "If we do not radically change the patterns of land ownership, control and management in South Africa we will be creating problems for ourselves in future. We need to take bold steps that will transform our economy, including land ownership, very fast."

It is partly because of the urgency of transforming South African society that the Agriculture and Land Reform Operation Phakisa was launched. ■

Rural economies' obstacles, solutions examined

Noluthando Motswai

Head of the launch of the Operation Phakisa on Agriculture, Land Reform and Rural Development in February 161 people worked

in labs to understand the obstacles and solutions to greater inclusivity for rural economies, and growth in the agricultural sector. President Zuma explained this at the launch.

The President said the

deliberations of the lab participants were organised according to seven work streams: land reform; producer support; livestock; grains; horticulture; labour, and rural development.

Centenary celebration of Oliver Tambo

"Comrades, you might think that it is very difficult to wage a liberation struggle.

Wait until you are in power. I might be dead by then. At that stage, you will realise that it is actually more difficult to keep the power than to wage a liberation war. People will be expecting a lot of services from you. You will have to satisfy the various demands of the masses of our people. In the process, be prepared to learn from other people's revolutions. Learn from the enemy also. The enemy is not necessarily doing everything wrongly. You may take his right tactics and use them to your advantage. At the same time, avoid repeating the enemy's mistakes."

– Oliver Reginald Tambo (Angola, 1977)
