Aviation now flying high in a Gauteng school

More Matshediso

Learners who have aspirations to join the aviation industry will soon be able to start acquiring suitable skills from as early as Grade 10 in Gauteng.

This is made possible by the Gauteng Department of Education as it has launched the Rhodesfield Engineering School of Specialisation with a focus on aviation.

The department's MEC Panyaza Lesufi said he was pleased to unveil another ground-breaking school of specialisation, which is situated close to the OR Tambo International Airport in Kempton Park.

"The school is one of 29 schools of specialisation, which have been redesigned

to address skills shortages to meet the economic demands of Gauteng Cities," said the MEC.

The school, which was previously known Rhodesfield Technical High School, offers compulsory subjects that include pure mathemat-

ics, pure physical science, Engineering, Graphics and Design. It will soon include aviation to its list.

Some of the subjects that the learners at the school enjoy include Mechanical Engineering and Electrical Engineering (power sys-

tems).

The Acting Principal of the school, Ansie Ras, said she was excited about the launch as the school will make a huge contribution to South Africa's aviation industry.

"We will be able to supply

the aviation industry with learners who are skilled in aviation and who are in a better position to choose careers in aviation," she said.

"We have partnered with a couple of airlines so that we will be able to take our learners to their technical sites for them to get the experience of the technical aspects of aviation," she explained.

At the moment the school teaches about 938 learners from Grade 8 to 12, but it has the capacity to teach about 1 300 learners per year.

Ras said admissions into the school for the Grade 8 class is controlled by the Provincial Department of Education through the online application process. Applicants have to be good in mathematics and natural science. ■

Fresh mind producing farming success

SAMBO WAS was motivated to be part of the family business when she realised that youth unemployment was a serious challenge in the country.

More Matshediso

At just 25, Sinthemba Sambo has managed to turn her parent's farm into a booming business.

The business, which is called Siyavuya Co-operative Limited, has livestock, crop production and aquaculture and operates on 20 hectares of land in Steenbok in Mpumalanga.

"My parents have decades of experience in farming, but they needed a young mind to take their family business to greater heights," said Sambo.

In 2012, she was appointed the Managing Director of Siyavuya Co-operative Limited

after completing her matric.

"My parents started the farm casually in 1989 and it has been the source of income for their household for as long as I can remember. When I joined the family business I wanted to make sure that it was more profitable."

She said she was motivated to be part of the family business when she realised that youth unemployment was a serious challenge in the country.

Sambo is also studying towards a Diploma in Business Administration and believes her new skills will help the business to improve over the years.

The business has assets that include 102 head of cattle, 354

sheep and goats, 34 pigs, 13 poultry houses, 54 beehives, 563 mango trees and five dams for fishing.

Venturing into aquaculture

After venturing into aquaculture in 2012, Siyavuya Co-operative Limited recently won the Fisheries Recognition Award in the small scale category during the Youth in Agriculture, Forestry and Fisheries (YAFF) Awards.

Sambo said winning the award only motivated the company to do better and to increase their footprint in the fisheries market.

"The four of our five dams are very large and have the capacity to accommodate

about two million fishes each. We produce three types of fish, including catfish, tilapias and kappas."

"We have recently signed a deal with one of the local butchers that sells meat to many communities in Mpu-

malanga, and we also sell our fish to the locals. Our business is doing well," she said.

Sambo said the cooperative has so far created employment for 15 permanent workers who rotate in all enterprises on the farm. ■
