## Vaccine registration open to the public

Government has officially launched the Coronavirus (COVID-19) vaccine online registration for the public – as the Department of Health gears up for phase two of the country's vaccine rollout.

Health Minister, Dr Zweli Mkhize, invited all citizens aged 60 years and above to register for vaccination on the Electronic Vaccination Data System (EVDS).

"This launch marks a significant milestone not only for our vaccination campaign but for South Africa's advancement towards Universal Health Coverage," said the Minister.

### One digital system

He explained that this was the first time in democratic history that a major public health campaign will be supported by one digital system for all South Africans.

"The President, myself,

hundreds of thousands of healthcare workers and now you, the citizens of

South Africa, have or will access the vaccines through the same process, by using

this system."

He said there will be no distinction between pri-

vate and state healthcare users, except that private healthcare users will need to share their medical aid details.

"The quality of services will be the same for all of us and the system will assign a vaccination site closest to our homes or where we work and not based on whether a particular site is a public or private facility."

Citizens must have their ID number, medical aid number, if they have one, and ensure they put in the correct cellphone number and residential address.

Registration on the EVDS does not guarantee that you will be vaccinated immediately.

"We will use the information you provide when you register to communicate with you about the vaccination programme when necessary," explained the Minister.

hala phaposing ya bookelo ya COVID-19. Ke ile ka tlameha ho ba hlokolosi le ho feta hobane ke ne ke sa batle ho beha bophelo ba mofumahadi wa ka kotsing," o rialo.

Ganuganu o ananela batsamaisi ba hae le basebetsi mmoho le ena.

"Ke batla ho ba leboha ka tshehetso ya bona le ho mpha monyetla wa ho hola jwalo ka mooki. Ke boiphihlelo bo botle

ho sebetsa le basebetsi mmoho ba tshehetsang basebetsi ba batjha mosebetsing."

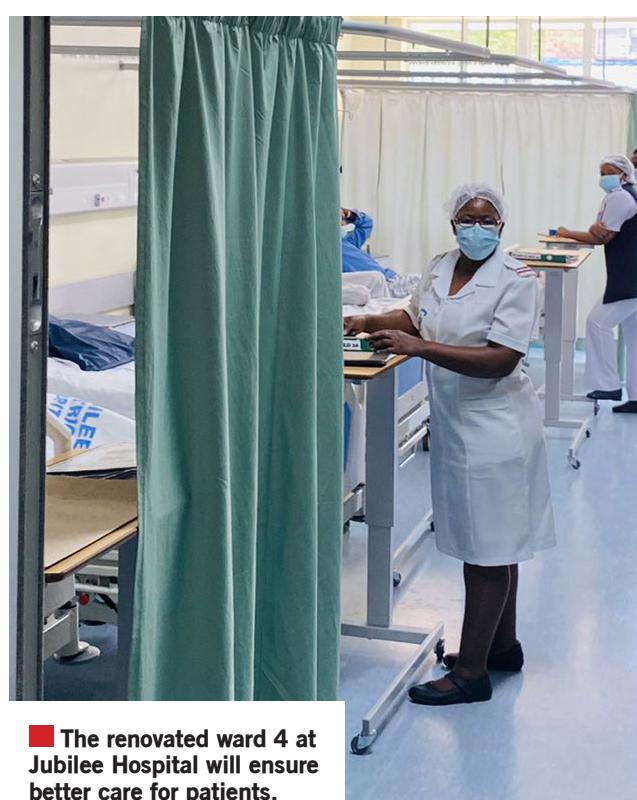

Molaetsa wa hae ho setjhaba ke hore se thuse baoki ka ho ba le maikarabelo.

"Re thuse ho o thusa. Motho e mong le emong o a tseba hore ho lebelletswe eng ho ena nakong ena ya COVID-19.

Ka kopo tswela pele ho latela tataiso le ho ikobela melawana yohle," ho rialo Ganuganu. 

## Jubilee Hospital facelift eases patient pressure

**A NEW TRAINING** facility, CT scanner and renovated ward at Jubilee Hospital will result in better patient care.

The renovated ward 4 at Jubilee Hospital will ensure better care for patients.

### Kgaogelo Letsebe

**J**ubilee Hospital in Hammanskraal, Gauteng, has undergone a major facelift and expansion that will see it not only increasing its capacity to handle patients, but also becoming a training facility for medical students.

The Gauteng Department of Health recently unveiled the renovated ward, computerised tomography (CT) scanner and a training lab to be used by medical students.

Gauteng Health MEC, Dr Nomathemba Mokgethi, said the improvements will ease the constant burden on the hospital.

"Because of the hospital's close proximity to the N1 and R101 roads, it has been flooded by trauma and emergency cases as a result of car accidents," she noted.

The renovated ward 4, with 31 allocated beds, will improve the hospital's capacity to handle these cases. The ward was previously closed and will now be used as an orthopaedic ward.

In 2020, the hospital was earmarked to provide Coronavirus Disease services and received an alternative building technology structure with 300 beds.

"The addition of 300 beds to the hospital's existing 551-bed capacity means it is growing

not only in terms of size, but in offering more services to the community.

"At present, the hospital is admitting all surgical patients, including general surgery, orthopaedics, urology, ophthalmology and gynaecology, to the same ward. We will now be able to separate the various units," said Jubilee Hospital Acting CEO, Dr Olebogeng Modise.

The new CT scanner will also mean fewer transfers to Dr George Mukhari Academic Hospital.

A CT scanner enables doctors to examine patients internally through X-ray images taken from different angles. Images of bones, blood vessels and soft tissues can be obtained, thereby providing more detailed information than plain X-rays.

"We are now able to admit more trauma patients and with the CT scanner, we can deal with trauma cases quicker than we were able to in the past," said Dr Modise.

The training facility will be used to train medical students in various fields, including surgery, emergency medicine and obstetrics.
